DC88P-1000 Type Monoblock, Single Pole Double Throw for Motor Reversing - IP66 (Part of the SW80 Series)

DC88P-1000 Type

The DC88P-1000 motor reversing type of contactors has been designed for direct current loads, particularly motors as used on electric vehicles such as industrial trucks. The DC88P-1000 Type is a monoblock construction, resulting in a neat compact design which is compatible with modern electronic control systems. Developed for both interrupted and uninterrupted loads, the DC88P-1000 Type is suitable for switching Resistive, Capacitive and Inductive loads and is sealed to IP67.

1000

riaht

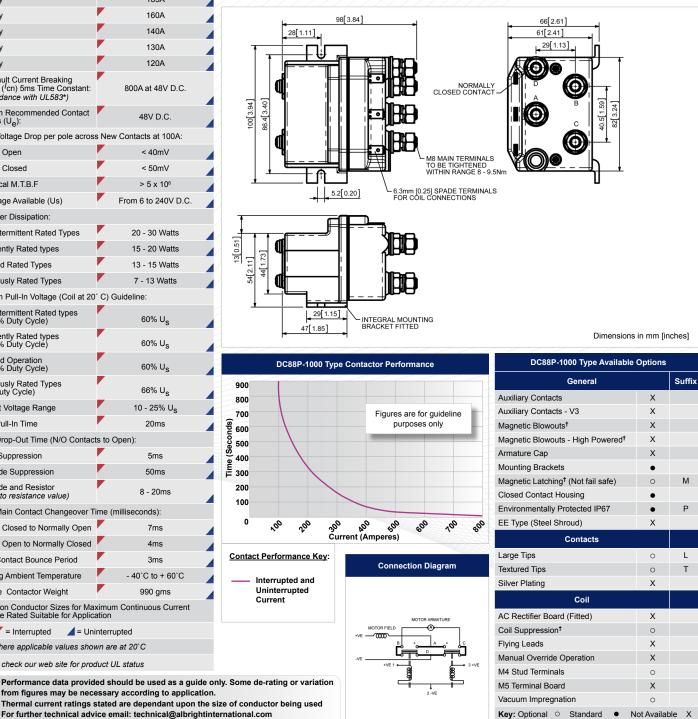

International 🥖

- Interrupted current opening and closing on load with frequent switching (results in increased contact resistance).
- Uninterrupted current no or infrequent load switching requirements (maintains a lower contact resistance).

The main contact circuit, designed for motor reversing, has a built in failsafe, so that if both coils are energised simultaneously the contact arrangement is open circuit. The DC88P-1000 Type has double breaking main contacts with silver alloy contact tips, which are weld resistant, hard wearing and have excellent conductivity. The DC88P-1000 Type M8 main stud terminals can be configured in a variety of ways

| Application  | Interrupted              | Uninterrupted           |  |
|--|--------------------------|-------------------------|--|
| Thermal Current Rating ( <sup>1</sup> th)  | 100A                     |                         |  |
| Intermittent Current Rating:   |                          |                         |  |

| Operating Ambient Temperature  | - 40°C to + 60°C         |                         |  |
| Guideline Contactor Weight   | 990 gms                  |                         |  |
| Connection Conductor Sizes for Maximum Continuous Current Should be Rated Suitable for Application                   |                          |                         |  |
| Key: 📕 = Interrupted 🖌 = Uninterrupted   |                          |                         |  |
| Note: Where applicable values shown are at 20°C  |                          |                         |  |

in order to suit the application. Coil connections are by means of 6.3mm spades and mounting is via the moulded bracket and can be horizontal or vertical, when vertical the M8 contact studs should point upwards. If the requirement is for downwards orientation we can adjust the contactor to compensate for this.
