The SW1000 is designed for use in telecommunication and power distribution applications where an uninterrupted load is switched. These contactors are primarily for use with Direct Current loads but can also be used with Alternating Currents.

12008

Allright International

Uninterrupted current - no or infrequent load switching requirements (maintains lower contact resistance).

Uninterrupted current	- no or infrequent load
Application	Uninterrupted
Thermal Current Rating (¹ th)	1200A
Intermittent Current Rating:	
30% Duty	2190A
40% Duty	1895A
50% Duty	1695A
60% Duty	1550A
70% Duty	1435A
Rated Fault Current Breaking Capa (in accordance with UL508*)	
SW1000	1800A at 60V D.C.
Maximum Recommended Contact	
SW1000 Typical Voltage Drop per pole	60V D.C. <50mV
across New Contacts at 100A	
Mechanical M.T.B.F Coil Voltage Available (U _S)	>1 x 10 ⁶
(Rectifier board required for A.C.)	From 6 to 240V A.C./D.C.
Coil Power Dissipation:	60 - 90 Watts
Highly Intermittent Rated Types Intermittently Rated Types	40 - 60 Watts
Prolonged Rated Types	35 - 40 Watts
Continuously Rated Types	25 - 35 Watts
Maximum Pull-In Voltage (Coil at 20	
Highly Intermittent Rated types (Max 25% Duty Cycle)	60% U _s
Intermittently Rated types (Max 70% Duty Cycle)	60% U _s
Prolonged Operation (Max 90% Duty Cycle)	60% U _s
Continuously Rated Types (100% Duty Cycle)	66% U _S
Drop-Out Voltage Range	10 - 30% U _S
Typical Pull-In Time	70ms
Typical Drop-Out Time (N/O Contac	cts to Open):
Without Suppression	15ms
With Diode Suppression	100ms
With Diode and Resistor (Subject to resistance value)	30ms
Typical Contact Bounce Period	< 5ms
Operating Ambient Temperature	- 40°C to + 60°C
Guideline Contactor Weight:	
SW1000	3235 gms
With Auxiliary	+ 20 gms

Copper busbar	722mm ² [1.12inch ²]
Cable	Rated suitable for Application
Key: / = Uninterrupted	
Note: Where applicable values sho	wn are at 20°C
* Please check our web site for pro	duct UL status

The SW1000 features double breaking main contacts with silver alloy tips which are weld resistant, hard wearing and have excellent conductivity. Silver plating on the main contacts is standard for the SW1000, however, optionally it can be excluded from the specification. This compact contactor can be busbar mounted vertically or horizontally, but if mounted vertically, the coil should be at the bottom. If the coil is required at the top, we can adjust the contactor to compensate for this. Optional extras include auxiliary switches, brackets, coil finishes and magnetic latching which allows the contactor to remain closed while consuming no coil power.
