The SW64P is a miniature series single pole, free standing, compact contactor which is sealed to IP66. The SW64P is designed to fill the gap between 30 ampere relays and 100 ampere contactors. Devised for both interrupted and uninterrupted loads, the SW64P is suitable for switching Resistive, Capacitive and Inductive loads. Interrupted Uninterrupted

95A

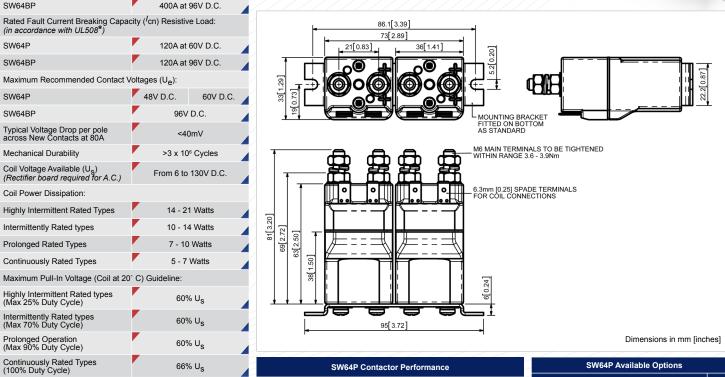

400A at 48V D.C.

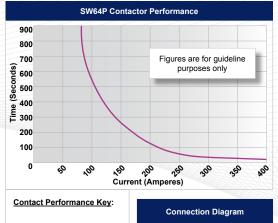

Typical applications include switching small traction motors, hydraulic power packs and small electric winch motors.

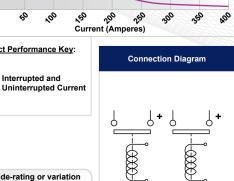

- Interrupted current opening and closing on load with frequent switching (results in increased contact resistance).
- Uninterrupted current no or infrequent load switching requirements (maintains a lower contact resistance).

The SW64P features a paired single pole double breaking main contacts with silver alloy tips, which are weld resistant, hard wearing and have excellent conductivity. The SW64P incorporates an enclosed top cover and offers environmental protection to IP66. It has M6 stud main terminals and 6.3mm spade coil connections. It can be base mounted via mounting brackets (supplied fitted).
