

Application	Interrupted Uninterrupted	
Thermel Current Peting (th)	1004	
Intermittent Current Rating (11)	TUUA	
	4054	
30% Duty	185A	
40% Duty	160A	
50% Duty	140A	
60% Duty	130A	
70% Duty	120A	
(in accordance with UL583*)	city ('cn) 5ms Time Constant:	
SW822	800A at 80V	
Maximum Recommended Contact \	/oltages (U _e):	
SW822	96V D.C.	
Typical Voltage Drop per pole across New Contacts at 100A	50mV	
Mechanical Durability	>5 x 10 ⁶ Cycles	
Coil Voltage Available (U _S) (Rectifier board required for A.C.)	From 6 to 240V D.C.	
Coil Power Dissipation:		
Highly Intermittent Rated Types	20 - 30 Watts	
Intermittently Rated types	15 - 20 Watts	
Prolonged Rated Types	13 - 15 Watts	
Continuously Rated Types	7 - 13 Watts	
Maximum Pull-In Voltage (Coil at 20)° C) Guideline:	
Highly Intermittent Rated types (Max 25% Duty Cycle)	60% U _s	
Intermittently Rated types (Max 70% Duty Cycle)	60% U _S	
Prolonged Operation (Max 90% Duty Cycle)	60% U _S	
Continuously Rated Types (100% Duty Cycle)	66% U _s	
Drop-Out Voltage Range	10 - 25% U _s	
Typical Pull-In Time (N/O contacts to close)	20ms	
Typical Drop-Out Time (N/O Contac	ts to Open) §:	
Without Suppression	5ms	
With Diode Suppression	50ms	
With Diode and Resistor (Subject to resistance value)	8 - 20ms	
Typical Contact Bounce Period	3ms	
Operating Ambient Temperature	- 40°C to + 60°C	
Guideline Contactor Weight:		
SW822	920 gms	
Advised Connection Sizes for Ma	ximum Continuous Current	
Copper busbar	80mm ² [0.124inch ²]	
Cable	Rated suitable for Application	
Key: V = Interrupted = Uninterrupted		
Note: Where applicable values shown are at 20°C

[§] The SW822 has fast drop out times and relatively slow pull-in times. Motor direction changes can be undertaken without risk of all contacts being closed at the same time. Note, some coil suppression such as diodes substantially increase drop out times		

and care must be taken to ensure suitable suppression is used (e.g.

from figures may be necessary according to application.

Performance data provided should be used as a guide only. Some de-rating or variation

diode and resistor in series)

The SW822 has been designed for Motor Reversing applications with direct current loads, particularly motors as used on electric vehicles such as industrial trucks. Developed for both interrupted and uninterrupted loads, the SW822 is suitable for switching Resistive, Capacitive and Inductive loads.

Interrupted current - opening and closing on load with frequent switching (results in increased contact resistance).

Uninterrupted current - no or infrequent load switching requirements (maintains a lower contact resistance).

1998

The SW822 features double breaking main contacts with silver alloy tips, which are weld resistant, hard wearing and have excellent conductivity. The SW822 has M8 stud main terminals and 6.3mm spade coil connections. Mounted using supplied brackets, mounting can be horizontal or vertical, when vertical the M8 contact studs should point upwards. If the requirement is for downwards orientation we can adjust the contactor to compensate for this.
